Information on school social work at the 78. Schule – Grundschule der Stadt Leipzig

Dear parents and guardians,

I would like to use this letter to inform you about the services and opportunities offered by school social work.

School social work is a field of action of youth welfare at the living and learning place school. Its goal is to accompany children in the process of growing up. School social work has already been in place at the 78th school since 2017, under the auspices of Caritasverband Leipzig e.V.

My name is Stephanie Förste and I am the contact person for the students' concerns. I support and accompany e.g. with:

- Problems with classmates, friends, parents and teachers,
- school difficulties,
- conflicts,
- difficult life situations.

In addition, I am happy to advise and support you as parents / guardians. For example, if you are worried about your child for various reasons or have questions about education or everyday school life.

In addition to personal counseling, I also work with smaller groups or with entire classes. The goal here is to strengthen the child's own personality and cooperation as well as to work on age-specific topics in a preventive manner. School social work is offered to the children both in the mornings at school and in the afternoons at the after-school care center.

For the success of school social work, I cooperate with the school administration, the teachers, as well as the after-school care and extracurricular partners.

I look forward to working with you and your child.

Stephanie Förste

school social work at the 78. Schule
